Use, care and support

Appropriate use of your safe

This Executive Safe protects records and many other valuables.

Testing shows that the interior temperature of the safe remains below 350°F (177°C) for 30 minutes during a fire up to 1100°F (593°C) when used properly. Your safe must be closed and latched in order to properly protect the contents from fire.

Important:

Because pearls sustain heat damage at temperatures below 350° F, we advise that you **DO NOT** store pearls in this safe.

Safe Care and Maintenance

When properly maintained, your safe will continue to operate and accurately read the authorized Passcode for many years. In order to ensure optimum performance of your safe, please follow these simple precautions:

Replace Batteries – For best results and performance, we recommend that the batteries be replaced at least once a year or sooner depending on amount of use.

Clean Hands - Never attempt to operate the digital keypad if your hands have excessive dirt, debris or liquids on them.

Clean Safe – To clean the surface of your safe, it is recommended that you use a mild cleaner (e.g., window cleaner) to avoid scratching or discoloring the surface. Always wipe dry and NEVER use abrasive cleansers on the safe or digital keypad.

Moisture – We recommend that you place delicate items such as pictures or intricate jewelry into an air-tight container before storing them in your safe. Avoid placing your safe in areas of high humidity. For optimum performance, the safe should be opened and aired out for at least 20 minutes every two weeks.

For future reference, store this Operation and Installation Guide in a secure area away from the safe. DO NOT DISCARD!
